About ACOMP 2019

The International Conference on Advanced COMPuting and Applications (ACOMP) is an annual international forum for academics, engineers, practitioners and research students to exchange their ideas, techniques, methods, and state-of-the-art applications for advanced computing. Initially formed as a scientific venue for high-performance computing & applications, the conference kept expanding and had a pedigree of attracting international and Vietnamese participants who are all interested in advanced topics of computer science & engineering. The first occurrence of ACOMP was dated back to as early as 2007.

In the year of 2019, our 13th edition of ACOMP offers a venue for discussing the impact of new computing trends (e.g., machine learning, blockchain, IoT) on the well-established areas of software engineering, circuit design, high performance computing and image processing. ACOMP 2019 will be collocated with the 6th International Conference on Future Data and Security Engineering, both of which will be held in the campus of Telecommunications University.

Call for Papers

We aim to build an international, research-centric yet industry-friendly environment where motivating ideas, intriguing talks and vibrant discussions in future computing trends could flourish. We solicit papers in the following areas: software engineering, high performance computing, systems & IoT technologies, image processing & machine learning.

Conference Themes

Theme 1. Modern Software Engineering
Theme 2. High Performance & Scientific Computing
Theme 3. Circuits, Systems and IoT Technologies
Theme 4. Computer Vision/Image Processing & ML

Key Dates

Submission: June 25, 2019
Notification: August 25, 2019
Registration: Sept 08, 2019
Camera-ready: Sept 08, 2019

Publication

ACOMP 2019 Proceedings will be published by the Conference Publishing Services (CPS). All the presented papers are to be submitted to the IEEE Xplore and IEEE CS Digital Library. ACOMP Proceedings have been indexed by proceedings.com and the DBLP bibliography since 2015.

Technical Program Committee

Stephane Bressan, National University of Singapore, Singapore
Alberto M. Gamberato, Barcelona Supercomputing Center, Spain
Eric Pardeede, La Trobe University, Australia
Elida Faja, University of Trento, Italy
Dirk Draheim, Tallinn University of Technology, Estonia
Alain Wegmann, EPFL, Switzerland
Trong-Nhan Phan, HCMC University of Technology, Vietnam
Michel Toulouse, Vietnamese-German University, Vietnam
Trong-Nhan Le, HCMC University of Technology, Vietnam
Surin Kittitornkun, KMIT Ladkrabang, Thailand
Tran Le Minh Sang, Zaloza, Vietnam
Ha Binh Minh, Bankung University, Vietnam
Quang Hung Nguyen, HCMC University of Technology, Vietnam
Dang Tran Tri, HCMC University of Technology, Vietnam
Truong Quang Vinh, HCMC University of Technology, Vietnam
Vo Tho Ngoc Chau, HCMU University of Technology, Vietnam
Khoang Nguyen-An, HCMU University of Technology, Vietnam
Rang Nguyen, HCMU University of Technology, Vietnam
Minh-Triet Tran, HCMU University of Science, Vietnam
Dinh Ba Tien, HCMU University of Science, Vietnam
Van Vu Nguyen, HCMU University of Science, Vietnam
Trinh Tan Dat, Sai Gon university, Vietnam
Tuan-Anh Tran, HCMU University of Technology, Vietnam
Nguyen Tran Huy Nguyen, HCMU University of Technology, Vietnam
